NWI-1

Staying On Top of Abuse Contact Changes

Piotr Strzyżewski

RIPE 72, DB-WG, 26.05.2016

NWI-1

- Idea raised by Denis Walker on the mailing list

- The resource holder could be unaware of changes made to the abuse contact details for his/her resources

- Result of any addition, change or deletion of any part of the abuse contact details put in his/her ORGANISATION object

NWI-1

- ❑ Currently in the phase 1 of NWI proces – looking for a consensus on the problem statement

- ❑ Please comment on the mailing list!

NWI-1 – possible solution (1)

❏ Idea by Danis Walker sent to the mailing list – could be used later on during the phase 2 of the NWI process

❏ Another attribute of the ORGANISATION object:

```
abuse-notif:     [required]    [multiple]      []
```

❏ Allow to keep an audit trail of any changes made to the abuse contact details for any parts of the resources

NWI-1 – possible solution (2)

- ❑ „required" - business rules enforce it's presence in some situations

- ❑ Should be added to any ORGANISATION object referenced by a resource object

- ❑ Only the "abuse-notif:" referenced via the top level of a resource object will be notified
