Technical report

We had "issues"...

- Presentation remotes (2.4ghz pollution?)
- Tivoli clicker only worked on one mac
- HDMI matrix switcher

The rest of the week

- Terminal room laptop (SSD died)
- Several Wi-Fi access points acting up
- Google says we're in Romania

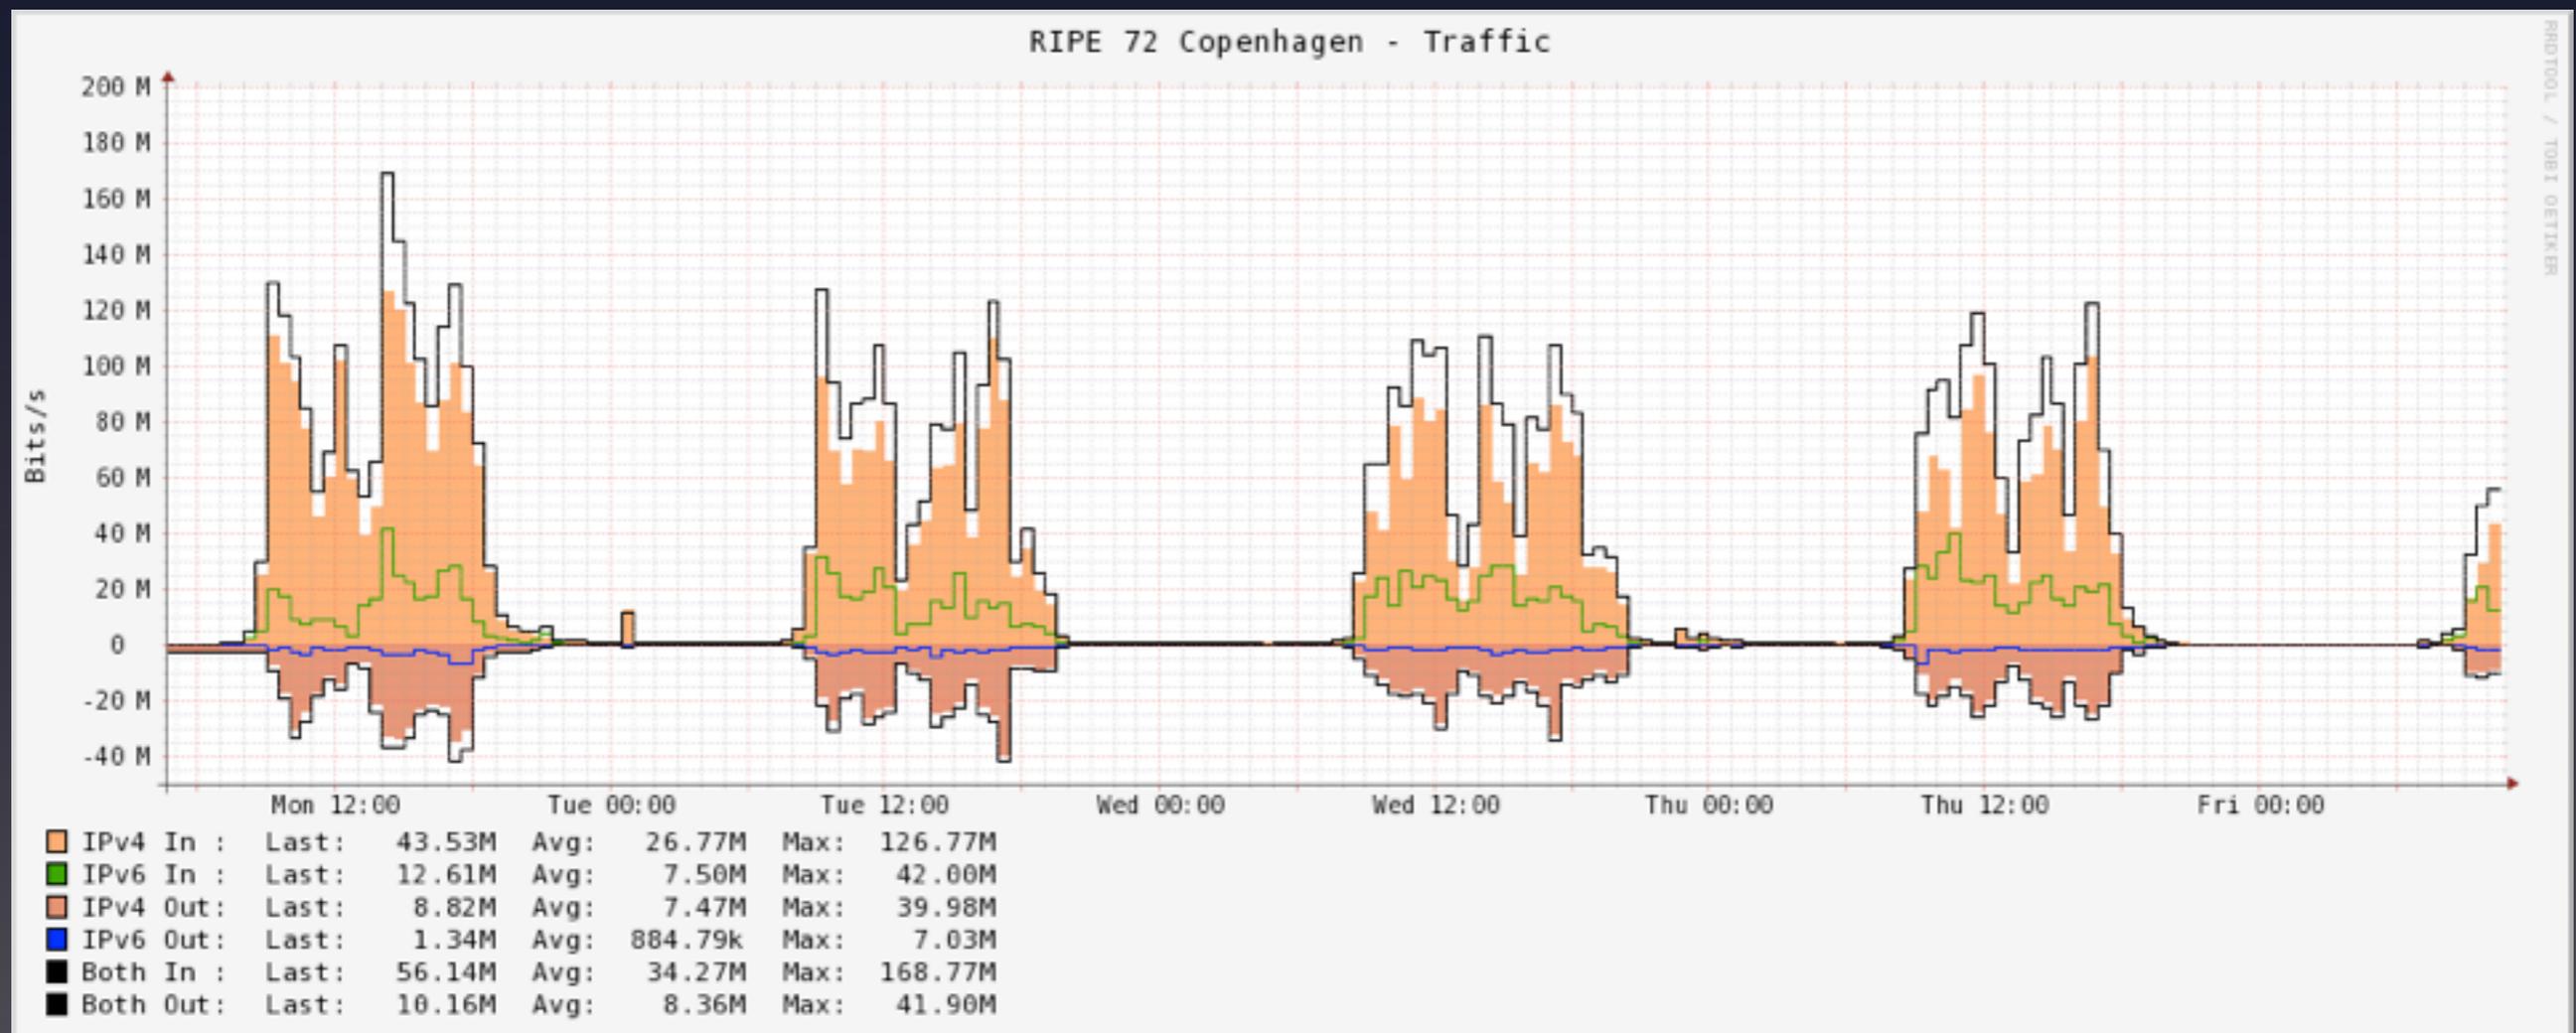

Network Stats

Uplink

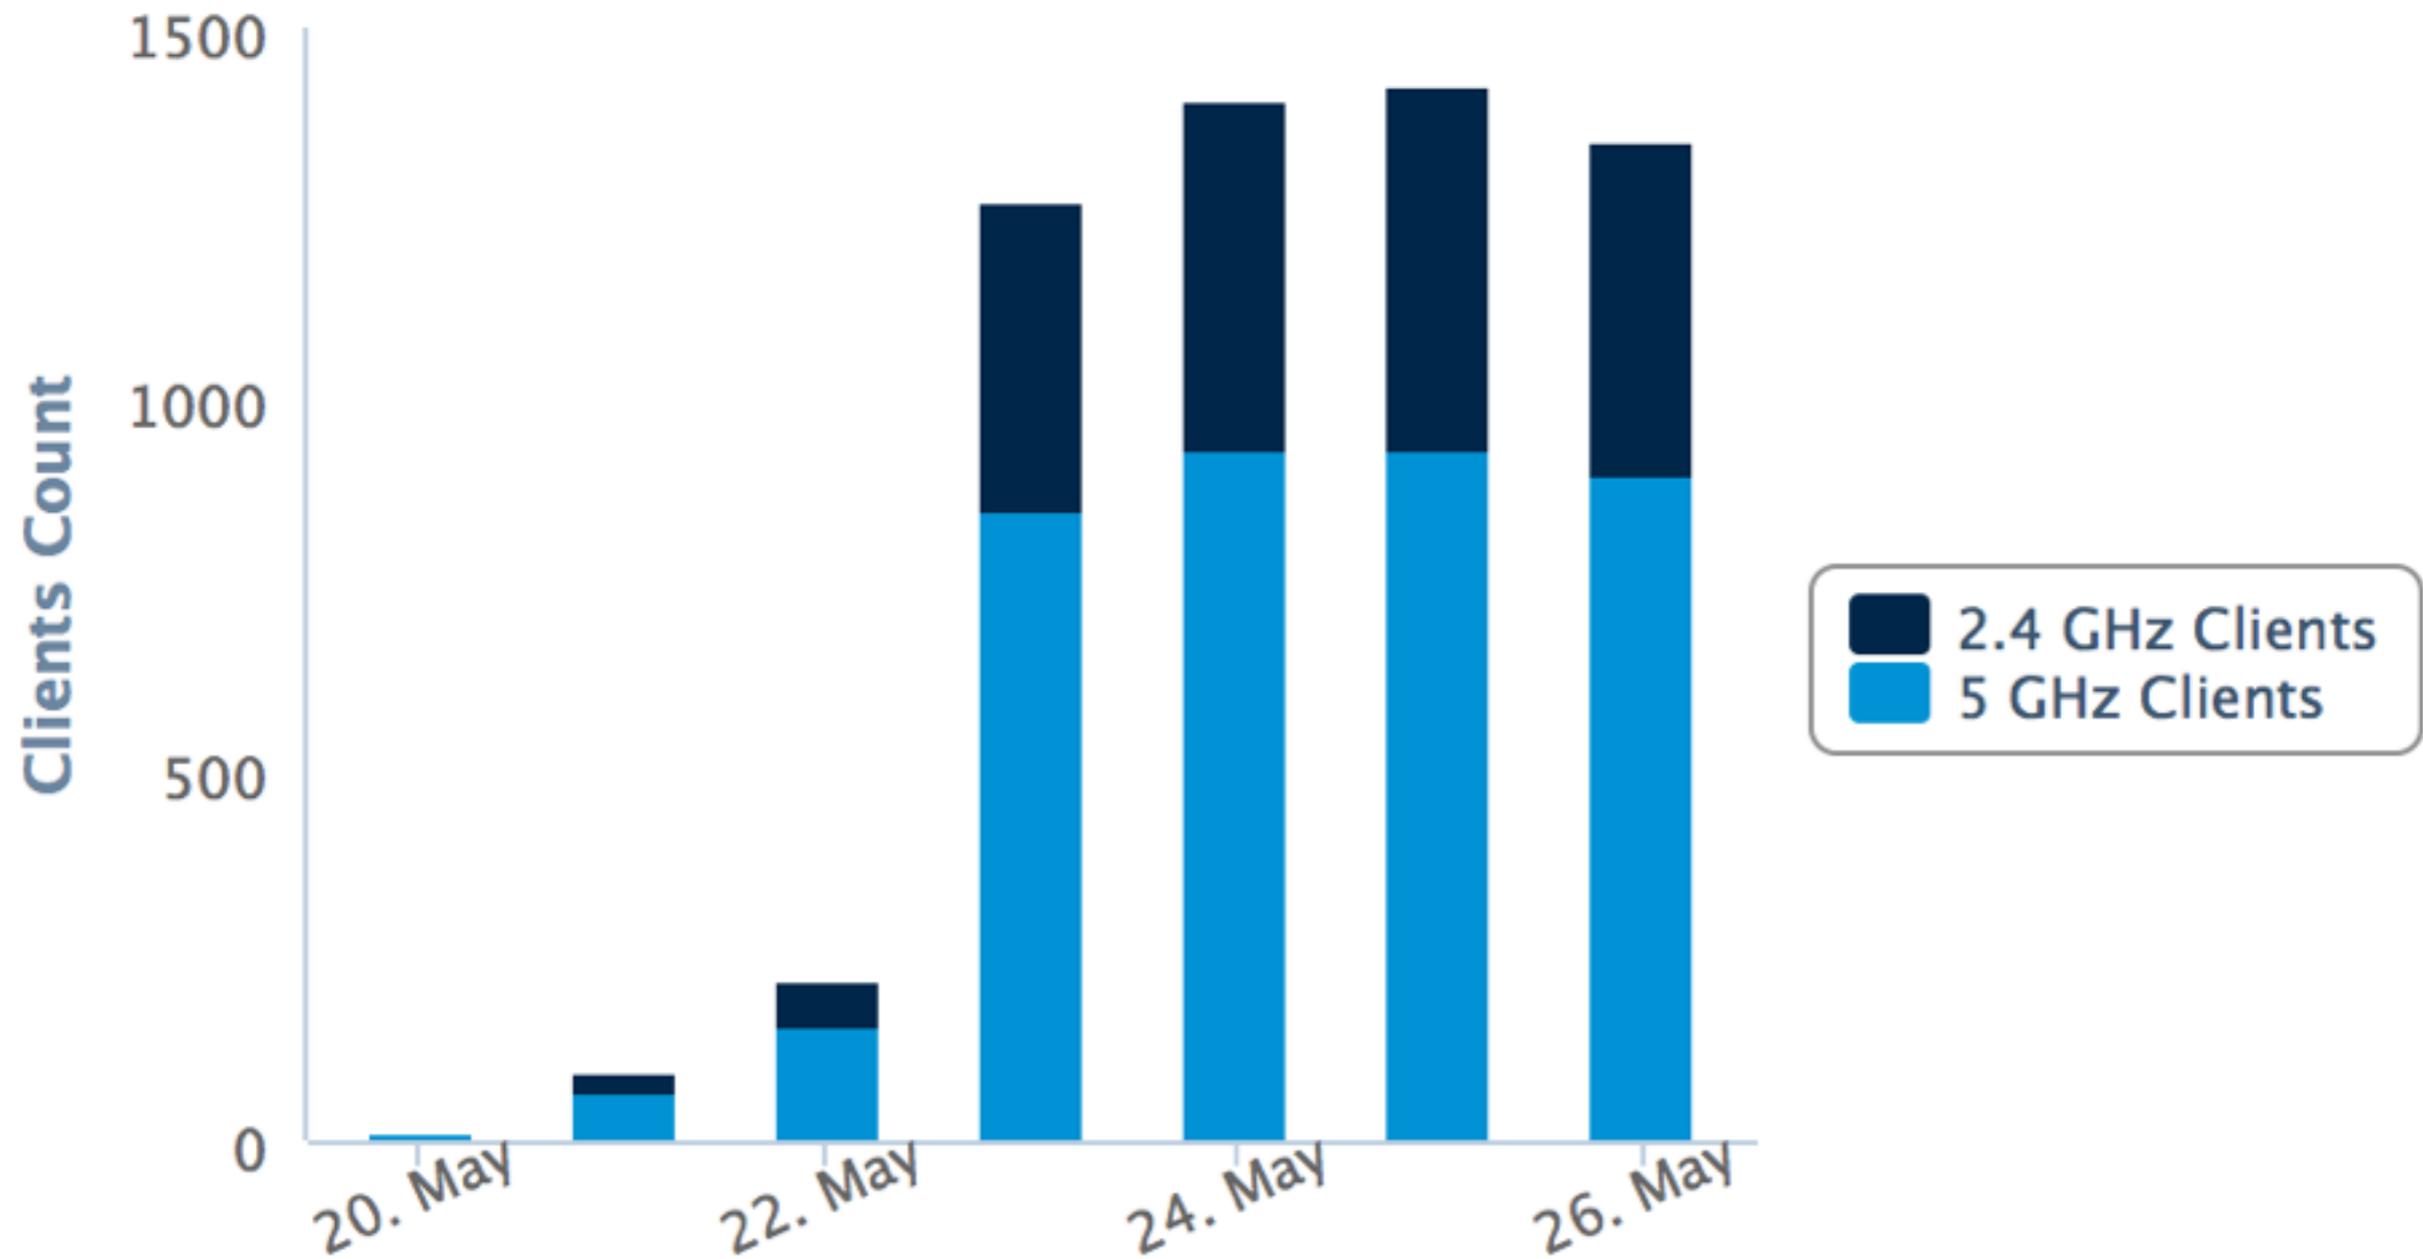

- 1Gbit connection via Globalconnect

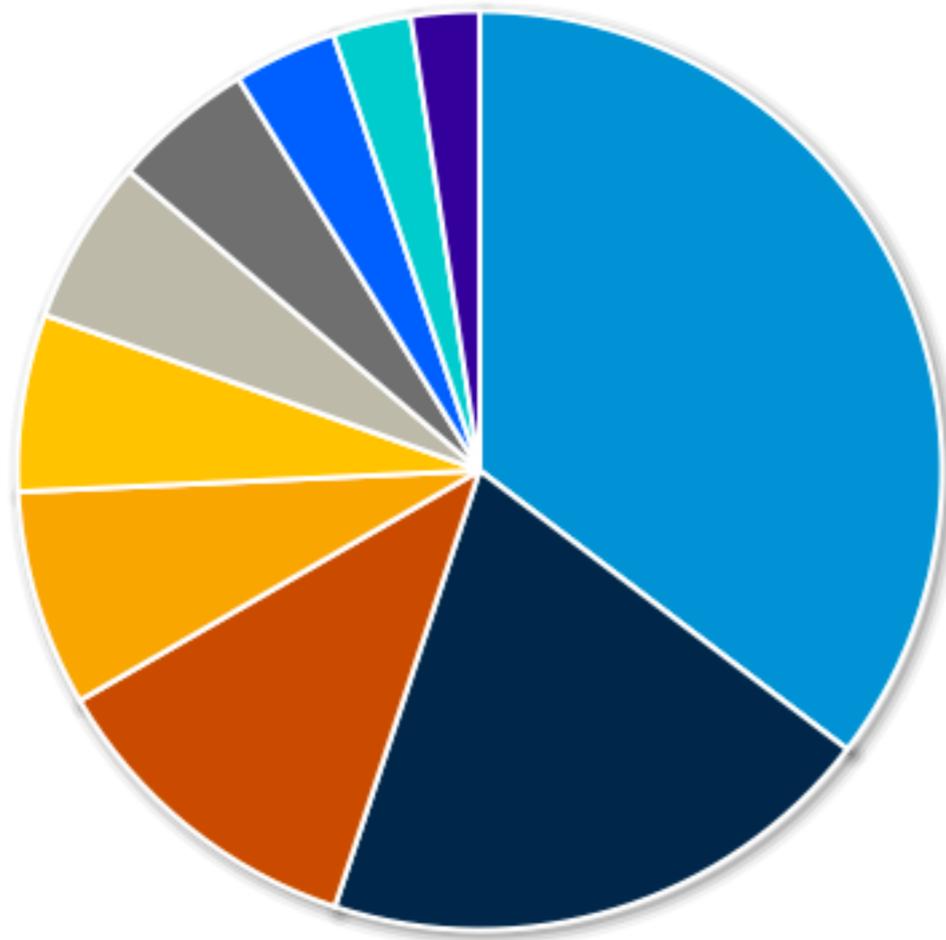

Unique Wi-Fi clients

Report Period: May 20, 2016, 12:00AM - May 27, 2016, 12:00AM

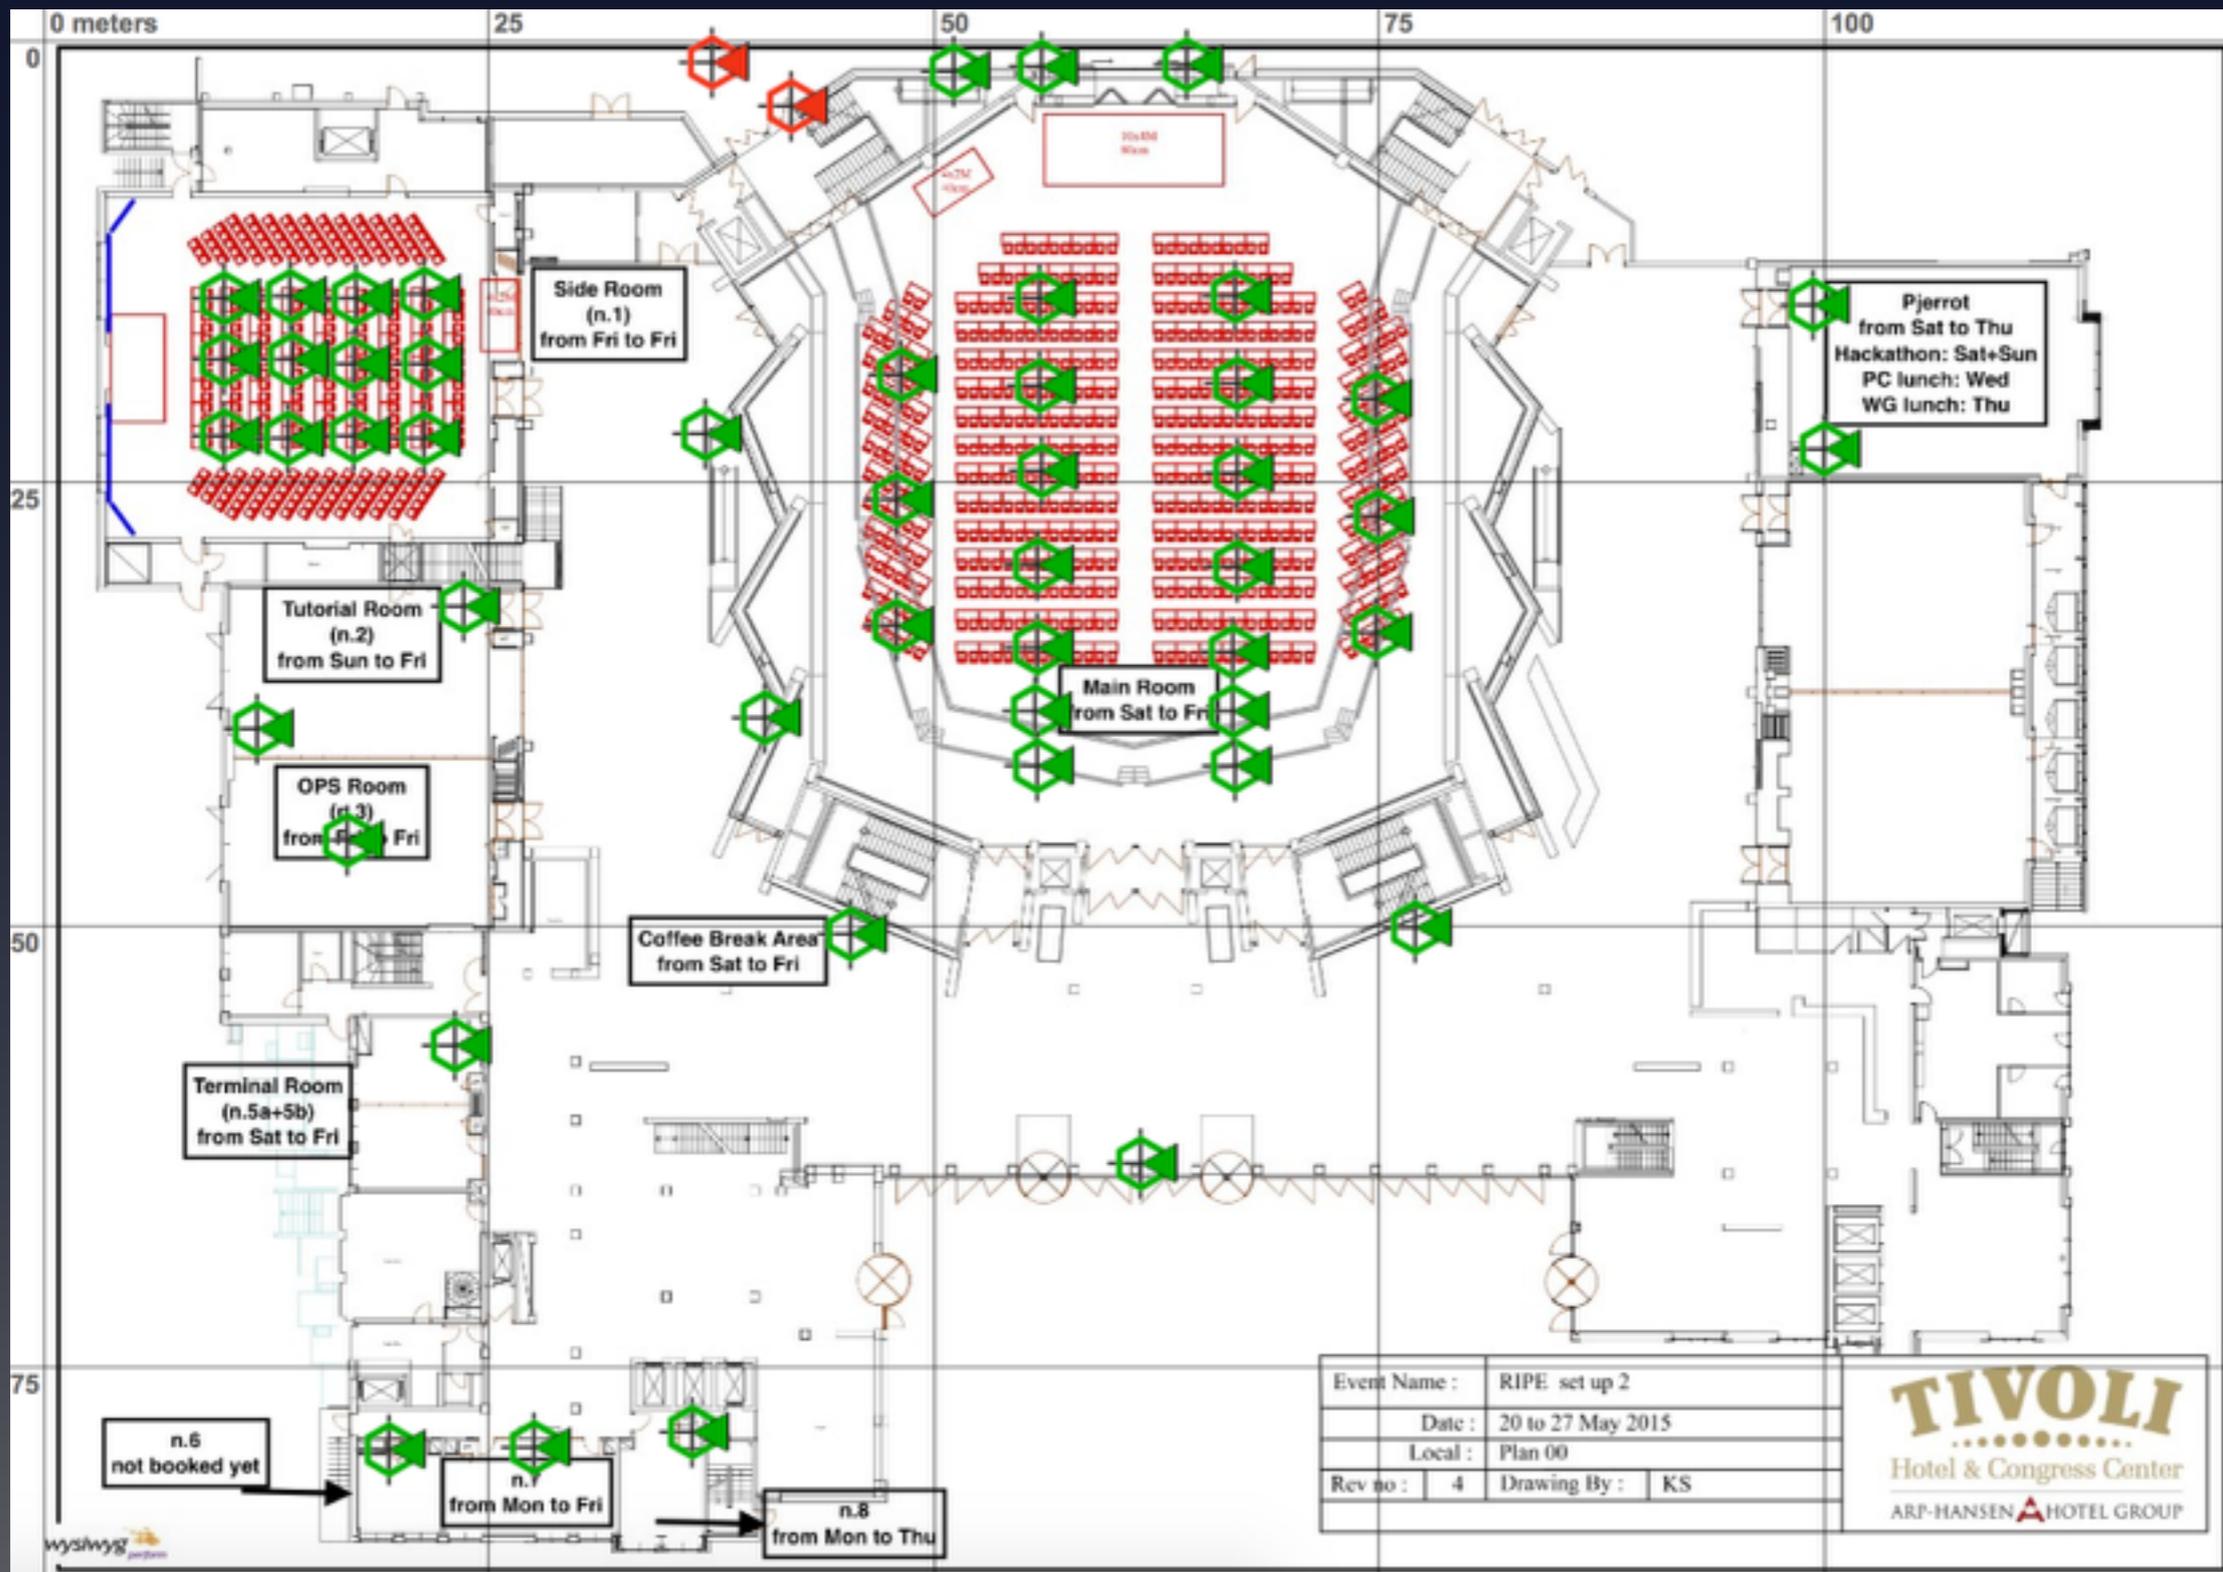

Wi-Fi stats

437.39GB	SSL
243.41GB	HTTP
143.17GB	OPENVPN
93.92GB	APPLE
77.15GB	BITTORRENT
71.59GB	UDP
61.38GB	IPSEC
44.67GB	APPLE UPDATE
33.90GB	HTTP VIDEO
29.58GB	TCP

Usage (GB)

Wi-Fi Deployment

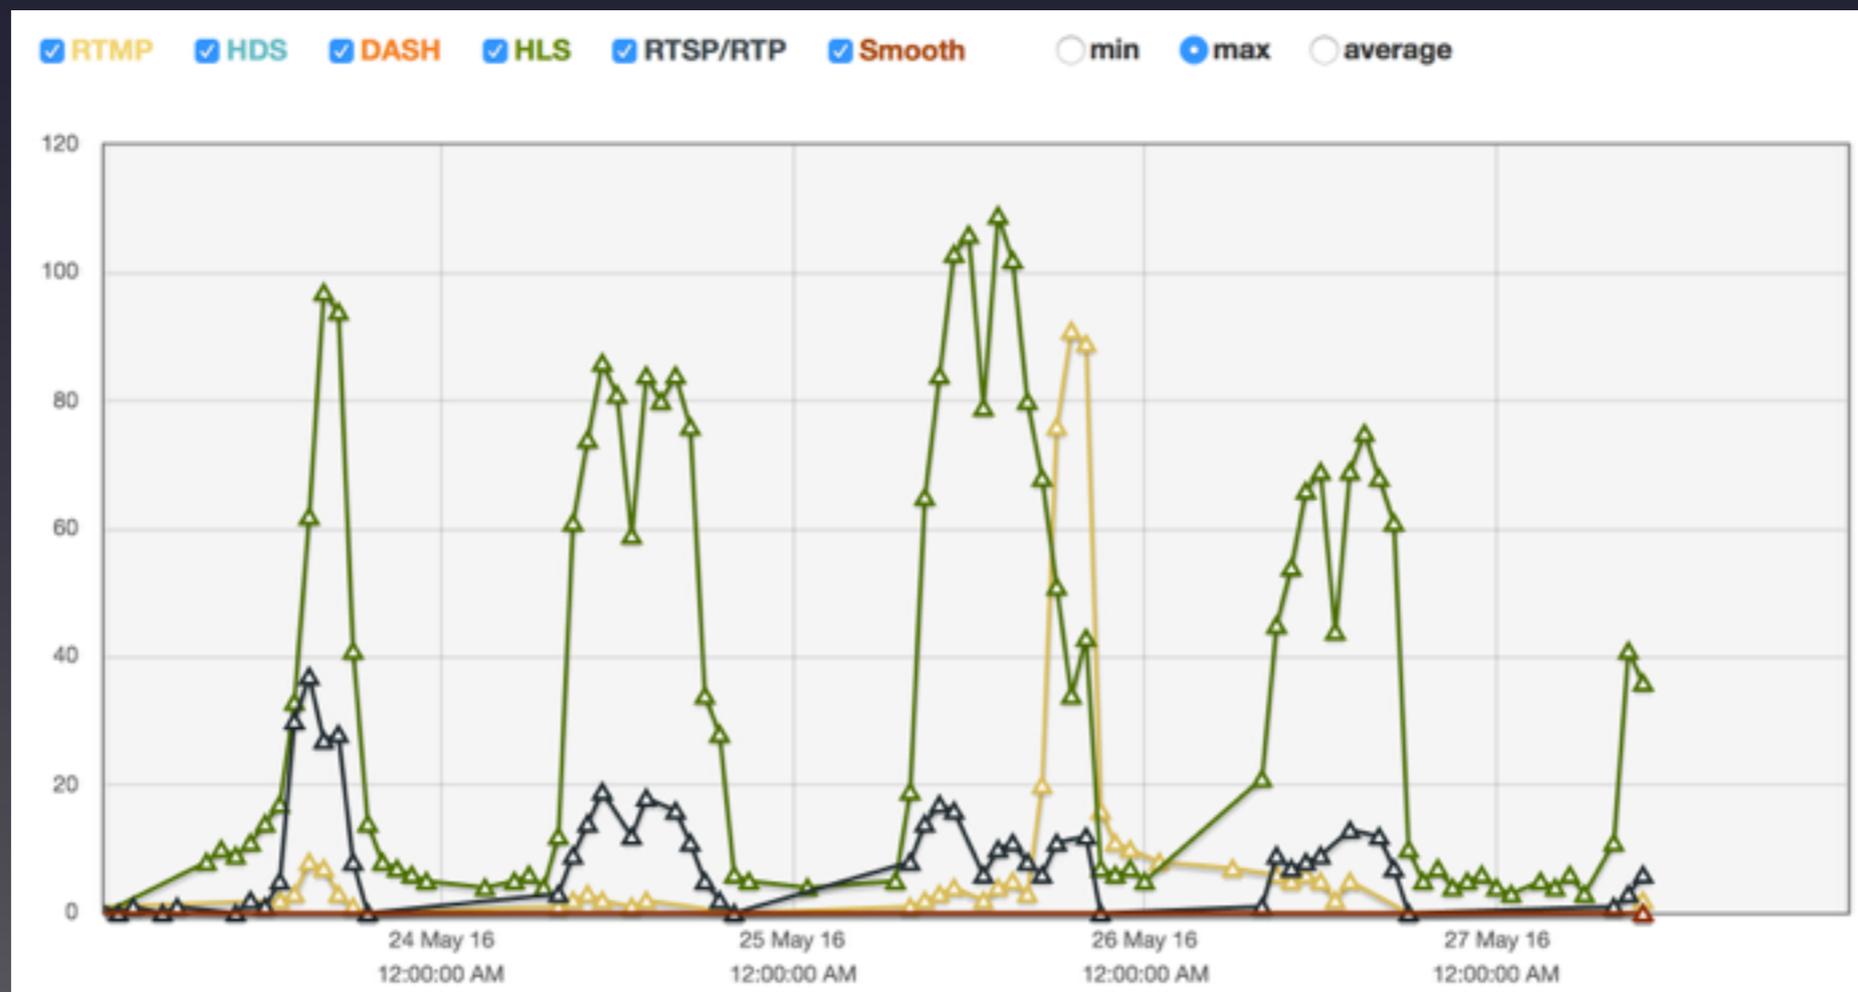

Webcasting

New and improved!

- Now over SSL
- Variable bitrate streams
- Peaking at almost 100 viewers
